

# SOLOAR GO ENERGY®

*Save money with your own solar energy,  
and at the same time you take care of the planet*

# ABOUT US

At **SOLAR GO ENERGY**, we are a company dedicated to the Solar Energy industry, which is growing rapidly. We believe that this industry, in addition to supplying a primary human need, such as energy for daily living, also represents the best and friendliest source of energy for the environment, with which we can contribute to reducing the disastrous effects of global warming that we are experiencing today, on our planet, at the same time that the energy needs of the daily life of human beings are covered.

We are really passionate about this industry, because it promotes the balance between the source of energy and the conservation of the environment, making it possible to reduce greenhouse gas emissions.

# OUR MISSION AND VISION

## MISSION:

Bring photovoltaic solar energy to the homes of our customers in the United States, in order to provide them with significant money savings, in the process of meeting their daily energy needs. Take care of our planet against greenhouse effect emissions, which generate global warming, through the use of the inexhaustible, renewable and clean source of solar energy.

## VISION:

To become the leading company in the photovoltaic solar energy market in the United States, with the main objective of improving the quality of life of our customers, reducing their monthly maintenance costs, while protecting and renewing the environment, without which human subsistence would not be possible.

# WHAT IS SOLAR ENERGY?

This type of energy, key to the sustainability of the planet, comes from the nuclear fusion of helium and hydrogen. On Earth, solar energy arrives in the form of electromagnetic radiation through light, heat and ultraviolet rays. The sun is the infinite power station of three renewable energies (solar photovoltaic, solar thermoelectric and solar thermal) that mitigate the effects of climate change.

There are three types of solar energy: Thermal, Photovoltaic and Passive. Photovoltaic is the one that allows to obtain electricity from solar radiation. This is a renewable, inexhaustible and non-polluting energy, which can be produced using photovoltaic solar panels. This is precisely our specialty at **SOLAR GO ENERGY**.

# GROWTH PROJECTION FOR THE SOLAR ENERGY INDUSTRY

Renewable energies will provide almost half of the world's electricity by the year 2050, solar energy leading this list.

The future of photovoltaic solar energy is therefore promising and represents a sustainable, clean and low-maintenance alternative that offers many benefits, the most important being the non-emission of harmful gases into the atmosphere and savings.

The future of solar energy indicates that it will become one of the main substitutes for fossil fuels. One of the reasons is the cheaper solar panels.

# BENEFITS OF SOLAR ENERGY

## ZERO DOWN PAYMENT (WITHOUT ANY INITIAL PAYMENT)

- Significant money savings month after month, compared to the increasing electricity rates that mercilessly hit homes today.
- It is renewable.
- It is an unlimited source of energy.
- It is the cleanest source of energy and does not endanger or increase global warming, since it does not produce greenhouse gases or dangerous by-products for the environment.
- It is available all over the planet, so it becomes the best way to provide electricity to isolated places, where the cost of installing electricity distribution lines is too high.
- The technology makes it possible to convert solar energy into electricity through photovoltaic devices and solar thermal energy.
- Contributes to sustainable development.
- Reduce the use of fossil fuels.
- Reduce energy imports.
- Little need for maintenance.
- Reduces carbon footprint.
- It is totally self-sufficient and independent to function.

**SOLAR GO ENERGY**

## BENEFITS OF SOLAR ENERGY

- PAY LESS ON YOUR ENERGY BILL**
- PROTECT YOURSELF AGAINST RISING ELECTRICITY RATES**
- BE PART OF THE EFFORTS IN FAVOR OF CLEAN ENERGY**
- INCREASE THE VALUE OF YOUR PROPERTIES**

### ZERO DOWN PAYMENT (WITHOUT ANY DOWN PAYMENT)

A photograph of a house with a red-tiled roof and several solar panels installed on it.

# NO DOWN PAYMENT?

# ZERO DOWN PAYMENT NO DOWN PAYMENT!

You do not need to make any initial payment to start the installation process. We put at your disposal our **SOLAR GO ENERGY** coverage and benefit of 100% comprehensive financing, with a payment that fits your family budget.

## Savings and Energy!

# WE HAVE OUR OWN FINANCING!

The qualification process for your financing is very simple, in just 5 minutes, you will have your credit approved!

Because we know how important your family or business is, our financing system has been optimized, in order to meet your request in less time in the industry, so that your installation is ready as soon as possible with **SOLAR GO ENERGY**.

# DO YOU WANT TO START SAVING MONEY AND TAKE CARE OF THE PLANET WITH US?

If after viewing this presentation, you want to quote the installation of the necessary equipment to have residential or business solar energy, contact our official sales representative, who shared this information with you, so that we can coordinate a visit and start the process. .

The sooner you switch to solar power, the sooner you'll begin to feel the relief of not having to pay the electricity rates that oppress millions of families in America every day.

# WHAT DO YOU NEED FOR A FREE EVALUATION?

- ✓ Property address
- ✓ Electricity bill on both sides
- ✓ Email
- ✓ Cell phone number

# SOLAR GO ENERGY®

*Because paying high electricity rates,  
It's a thing of the past with SOLAR GO ENERGY!*
